Full Stack Developer and DevOps

Code: juandisay.org/git

Hi, I am juan, I'm active as an open source on github and a full stack developer (primarily work as a backend with python and NodeJs) and medium level devOps.

But I'm fallin in love with modern FrontEnd like vue, Angular, and cross platform desktop with Electron javascript.

My current works as a full time freelance Remote in a company around the World via Linkedin, Upwork, etc engaged in data scraping, data crawling, microservice, serverless, and ecommerce.

Being a professional programmer, I like clean code, simple, with documentation. Being part of a team is a **Motivation Booster**, but if you need it as a full time developer, I'm ready to become a **Bathman**.

LANGUAGES

English : Conversational

Indonesia : Fluent
